PLEASE NOTE: Contact Efficiency Maine for a complete listing of eligibility and program requirements.

Efficiency Maine has calculated fixed or "Prescriptive Incentives" for certain types of equipment that generate consistent savings over a wide range of applications including: Lighting, HVAC equipment, variable-speed motor drives, commercial refrigeration, and agricultural equipment.

"Custom Incentives" are offered to encourage creative solutions by supporting energy-efficient electrical equipment for which costs and savings vary by application. The amount of Custom Incentives also varies by project:

- For retrofit projects, the amount of the Efficiency Maine Custom Incentive may be up to 35% of the total cost of the efficiency project, including labor.
- For new construction and major renovations, as well as replacement of failed equipment, the incentive may be up to 75% of the incremental cost of high-efficiency equipment over standard equipment.

Efficiency Maine also provides low-interest financing up to \$35,000 currently at 1% interest. An energy audit identifying recommended energy efficiency measures is required.
