Applicant's signature

EFFECTIVE IMMEDIATELY

Due to continued high theft rate of copper and the high price of copper causing most developers to utilize plastic water main lines: ALL COPPER BONDING WIRE TO ANY OF THE GROUNDING ELECTRODE SYSTEM MUST BE INSTALLED WITHIN A PVC OR EMT SLEEVE FROM THE METER TRIM TO THE FIRST GROUNDING ELECTRODE. ALL SLEEVES MUST BE SECURED TO THE BUILDING STRUCTURE.

Work cannot begin until payment is rendered; application is complete; and acknowledgement that any heat pump or outside attachments are understood to meet setback rules of said property.
