TITLE: ORDER, AUTHORIZE CONTRACT WITH MARCEL A. PAYEUR, FOR RECOATING AND UPGRADES TO LEVENSELLAR STORAGE TANK.

Filed May 20, 2025
By Jenn M. Morin

WHEREAS, the Brewer Water Department's Levensellar Storage Tank requires internal and external recoating to prevent further corrosion and structural damage; and

WHEREAS, this project has received partial federal funding in the amount of \$1,006,000, to be matched by up to \$345,000 from Brewer Water Department reserve funds; and

WHEREAS, the design and specifications for this project are complete, having been funded by a \$52,000 engineering and design grant awarded by the Maine Drinking Water Program (MDWP) in 2022; and

WHEREAS, this project is included in the previously approved FY25 Capital Improvement Plan under the "Paint Levensellar Standpipe – Internal & External" account 0571002-572000 for a total budget of \$1,500,000; and

WHEREAS, the Brewer Water Department solicited bids for the recoating, repairs, and upgrades, and Marcel A. Payeur submitted a bid in the amount of \$1,157,000.

NOW, THEREFORE, BE IT ORDERED, that the Brewer City Council hereby authorizes the City Manager, or his designee, to enter into a contract with Marcel A. Payeur in the amount of \$1,157,000 for the recoating and upgrades to the Levensellar Storage Tank; and

BE IT FURTHER ORDERED, that the City Council authorizes a contingency of up to 10%, or \$115,000, to be used if necessary, during the course of the project; and

BE IT FURTHER ORDERED, that the City Council authorizes the appropriation and expenditure of up to \$1,272,000 for this project, to be funded from Water CIP account "Paint Levensellar Standpipe – Internal & External," account number 0571002-572000.

Statement of Fact: This order authorizes the Brewer Water Department to contract with Marcel A. Payeur the lone bidder for recoating and upgrades to the Levensellar Storage Tank, including construction of a new control building. Previous inspections have revealed failure of the interior coating and the development of rust on the steel structure. If left unaddressed, this deterioration will result in premature failure of the tank and cause water quality issues.
